

NP Installation Series

NP4100/NP4100W installation and large venue digital projectors

Powerful installation projector equipped to take on the most demanding integration projects.

FLEXIBILITY ENABLES PERFORMANCE

- 6200 ANSI lumens (NP4100) and 5500 ANSI lumens (NP4100W)
- NP4100W with a WXGA (1280 x 800) native resolution was designed with the future in mind: support of the emerging widescreen resolutions used in more of today's computers along with the ever-increasing demands for HD signals. Native 4:3 resolutions up to 1600 x 1200 are supported.
- Vertical and horizontal lens shift enables flexible projector placement
- Ships lensless with a complete line of optional bayonet style lenses (5) for quick and easy lens exchange. Optional lenses enable the user to determine the appropriate lens to cover projection distances between 2.6 - 283 feet.
- Dual or single lamp operation. Selectable settings allow for multiple light outputs and extended lamp life
- Power zoom and focus simplifies installation and operation
- BrilliantColor™ technology can dramatically increase system brightness and color saturation at mid and low video levels, while optimizing color gain across the full color gamut
- DynamicBlack™ technology allows for dramatic improvement in the black level of the video, producing incredible detail in dark scenes
- Advanced color management adjusts for input type (high-bright, presentation, video, movie, graphics and sRGB)
- For applications requiring maximum brightness, a 4-segment color wheel is preinstalled. For video quality color reproduction, a 6-segment color wheel is included.
- 1W of power consumption while in stand-by mode

INTEGRATED NETWORKING AND ASSET MANAGEMENT

- Integrated RJ45 connection for quick connection to the LAN (10/100 base-T capability)
- Remote diagnostics enable the user to monitor and make adjustments to the projector via the network from a remote location
- Built-in HTTP page allows for control and monitoring over a LAN network. Email notification of error messages or lamp end-of-life can be sent to remote locations.

EXTENDING THE LIFE OF THE PROJECTOR

- Extended use operation for the most demanding applications
- ECO Mode™ technology extends lamp life by up to 25%
- Quick Power Off protects the lamp during the cool down period if the power is removed by unplugging the power cord or when the power strip is switched off. Lamp temperature is monitored internally during this period to prevent unit power on until the lamp is properly cooled.
- Sealed optical block minimizes the effects of dust, helping to ensure the delivery of crisp, distortion-free images

Tilt-Free Installation
The NP4100/
NP4100W can be
rotated freely (360°)
in order to point up
or down depending
on the installation
requirements.

Series Features and Benefits

EXTENDED USE OPERATION

COMPLETE LINE OF (5) BAYONET
STYLE LENSES

POWERED VERTICAL AND
HORIZONTAL LENS SHIFT

POWER ZOOM AND FOCUS

DUAL/SINGLE LAMP OPERATION

BUILT-IN LAN CONNECTION
FOR CONTROL

COMPREHENSIVE INPUT PANEL

DUST-RESISTANT DESIGN WITH
SEALED OPTICAL BLOCK

UNIQUE FEATURES

Automatic signal detection instantaneously connects with the live source

Flexible video/data connections, including S-Video, component video, three computer inputs (VGA, RGBHV, DVI with HDCP), and monitor output

Cabinet control lock setting enables user to deactivate buttons on cabinet to prevent unwanted changes to projector settings

Password protection restricts unauthorized use of projector

AutoSense™ automatically syncs with any computer signal and features one touch image optimization

VORTEX™ Technology Plus breakthrough image processing technology improves white level, color accuracy, dynamic range and varying levels of black in an image

ECO Mode technology extends lamp life, lowers audible noise and reduces total cost of ownership

Kensington lock slot enables security cable to be attached to projector

64-step image magnification with location control

WARRANTY

Registered owners receive a 3-year parts and labor warranty including the first year of InstaCare. The lamp is covered for one year or 500 hours, whichever comes first. InstaCare provides the original owner one year of either limited 3-business day repair/return or next business day exchange.

IN THE BOX

Remote control, batteries, power cord, 6-segment color wheel, user's manual on CD-ROM, quick start guide, product registration card, anti-theft screw for lens
